**DETAILED ACTION**

***Election/Restrictions***

Applicant's election without traverse of Group I and Species A, a claim 1-8 and 10-13 in the reply filed on 3/21/06 is acknowledged.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-8 and 10-13 are rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent 96,880 Bull.

Bull discloses the same invention being an actuator for moving an intraluminal shaft, the actuator comprising a housing (A) having a channel through its center with multiple inclined opposing surfaces, a pivotable actuator assembly (figure 2) having first and second spaced apart jaws (L), and a shaft (D). The jaws engage opposing inclined surfaces of the housing that allow them to be in a first nongripping position with a large dimension and a second gripping position where they engage the shaft and have a smaller dimension. Bull further discloses another gripping surface b that is curved.
